

Implementing the 2018 SOC in the OES program Estimates – May 2019 Hybrid Occupations

The Occupational Employment Statistics (OES) program began implementing the 2018 Standard Occupational Classification (SOC) system starting with data collection for the November 2018 panel.

During the transition to the 2018 Standard Occupational Classification (SOC) system, OES estimates will be based on a hybrid structure that is a combination of the 2010 SOC and 2018 SOC.

OES estimates are calculated using data collected from six survey panels over three years.

Because data will be collected under two different systems (2010 SOC and 2018 SOC), estimates for May 2019 and May 2020 will be based on a hybrid of the two classification systems.

The **May 2019** OES estimates, published in June 2020, will be based on 4 panels of data collected using the 2010 SOC and 2 panels of data using the 2018 SOC. The Bureau of Labor Statistics (www.bls.gov/oes/tables.htm) published the data using the OES Hybrid code but the data published on WisConomy uses the SOC code.

The **May 2020** estimates, to be published in summer 2021, will be based on 2 panels of data collected using the 2010 SOC and 4 panels of data using the 2018 SOC.

The **May 2021** estimates, to be published in summer 2022, will be the first OES estimates based solely on the 2018 SOC.

A list of the May 2019 hybrid occupations and the occupations on which they are based is listed below.
